INNOVATION IN EQUITATION

- Classical riding for all types of horse and rider, whatever the shape and size!
- Pioneering the teaching of riding with horse movement simulators.
- Equisimulator workshops – demystifying the techniques of riding through unique 'hands-on' teaching methods, and clear explanation/ demonstration.
- *Riding in True Harmony With Your Horse* by Heather Moffett "This would have to be the best book that I have ever read about riding"
- Design of saddles and accessories, giving unrivalled comfort and increased performance for both horse and rider.

Featuring the **Equisimulator** - this machine simulates the movement of the horse, and is used for teaching the rider to synchronise their own movements with those of the horse – by getting it right before you even get on your horse you save him much discomfort.
